

# *Advances in Agro-technology*

A Text Book

Humberto G Rodriguez  
A V Ramanjaneyulu  
N C Sarkar and Ratikanta Maiti

# Contents

<b>1</b>	<b>Precision Agriculture: Moving forward</b>	<b>1</b>
1.1	Introduction . . . . .	1
1.2	Goals, means and fields of precision agriculture . . . . .	2
1.3	The main fields of research and development . . . . .	4
1.3.1	Satellite-based information and navigation systems . . . . .	4
1.3.2	Remote sensing . . . . .	5
1.3.3	On-the-go vehicle sensors . . . . .	8
1.4	Wireless sensors . . . . .	11
1.5	Major current issues in greenhouse technology . . . . .	14
1.6	Concluding remarks . . . . .	17
1.7	References . . . . .	17
<b>2</b>	<b>Plant Growth Promoting Rhizobacteria (PGPR) in Agricultural Sustainability</b>	<b>21</b>
2.1	Introduction . . . . .	21
2.2	Plant growth-promoting rhizobacteria (PGPR) . . . . .	22
2.3	Genetic diversity of rhizobacteria . . . . .	24
2.4	Biological nitrogen fixation . . . . .	25
2.5	Phosphate solubilisation . . . . .	28
2.6	Production of plant growth promoting substances . . . . .	29
2.7	Biocontrol of plant pathogens . . . . .	30
2.8	Antifungal activity . . . . .	32
2.9	Siderophore production . . . . .	32
2.10	PGPR in HCN production . . . . .	33
2.11	Conclusion . . . . .	34
2.12	References . . . . .	35
<b>3</b>	<b>Organic Agriculture</b>	<b>43</b>
3.1	Introduction . . . . .	43
3.1.1	Historical background . . . . .	43
3.2	Modern organic farming . . . . .	43
3.2.1	Advantages of organic farming . . . . .	45
3.2.2	Disadvantages of organic farming . . . . .	46
3.3	Principles and practices . . . . .	47
3.3.1	Organic agriculture nurtures soil biodiversity . . . . .	48
3.3.2	Practices involved in organic farming . . . . .	50

3.4	Nutrient management by organic approach . . . . .	52
3.4.1	Use of traditional additives for organic farming . . . . .	52
3.4.2	Use of non-traditional additives for organic farming . . . . .	55
3.5	Components of Organic Farming . . . . .	61
3.5.1	Organic seed treatments and coatings . . . . .	63
3.6	Weed management through organic farming . . . . .	64
3.6.1	(A) Cultural measures . . . . .	65
3.6.2	(B) Mechanical measures . . . . .	68
3.6.3	(C) Biological control measures . . . . .	70
3.7	Biopesticides for plant disease management . . . . .	71
3.7.1	Benefits and limitations of biopesticides . . . . .	72
3.7.2	Strategies of pest management in organic farming . . . . .	72
3.7.3	Approved chemicals for use in organic postharvest systems . . . . .	76
3.8	Organic certification . . . . .	79
3.8.1	Standard and regulation-Global view . . . . .	79
3.8.2	Steps involved in certification . . . . .	80
3.8.3	Benefits of organic certification . . . . .	80
3.9	References . . . . .	80
<b>4</b>	<b>Sustainable Insecticide Use</b>	<b>83</b>
4.1	Introduction . . . . .	83
4.2	Concept for consideration before pest control decisions . . . . .	85
4.2.1	Cost/Benefit analysis . . . . .	85
4.2.2	Benefit/Risk analysis . . . . .	85
4.2.3	Time of intervention . . . . .	85
4.3	Insecticide abuse . . . . .	86
4.3.1	Application of wrong dose . . . . .	87
4.3.2	Application of wrong product . . . . .	87
4.3.3	Application at a wrong time . . . . .	87
4.3.4	Use of expired products . . . . .	87
4.3.5	Wrong application method . . . . .	87
4.3.6	Post application food poison . . . . .	88
4.3.7	Product piracy . . . . .	88
4.4	Alternatives to overdependence . . . . .	88
4.5	Host plant resistance . . . . .	90
4.6	Reduce overdependence on synthetic insecticides . . . . .	90
4.7	Botanicals: How far can we go? . . . . .	92
4.7.1	Benefits of botanicals . . . . .	92
4.7.2	Constraints of botanical insect control . . . . .	94
4.7.3	The way forward . . . . .	95
4.8	Conclusions . . . . .	98
4.9	References . . . . .	98
<b>5</b>	<b>Impact of Dependence on Agro Chemicals on Indian Agriculture, Implications and Management Strategies</b>	<b>107</b>
5.1	Introduction . . . . .	107
5.2	Productivity enhancing chemicals . . . . .	108

5.2.1	Trends in chemical fertilizer use . . . . .	108
5.2.2	Impact on environment . . . . .	109
5.3	Productivity protecting chemicals . . . . .	115
5.3.1	Trends in pesticide use . . . . .	115
5.4	Impact on environment and consumers . . . . .	116
5.4.1	Water contamination . . . . .	116
5.4.2	Food contamination . . . . .	118
5.4.3	Effect on human health . . . . .	122
5.4.4	Export concerns . . . . .	124
5.4.5	Impact on microbial and beneficial insects . . . . .	124
5.4.6	Pest/Pesticide resistance . . . . .	125
5.5	Change in production strategy . . . . .	127
5.5.1	Minimizing the adverse effects of chemical fertilizer . . . . .	127
5.5.2	Minimizing the adverse effects of chemical pesticides . . . . .	130
5.5.3	Government policies and regulation . . . . .	137
5.5.4	Awareness campaigns . . . . .	137
5.6	Conclusion . . . . .	138
5.7	References . . . . .	139
<b>6</b>	<b>Soil Quality: A New Challenge for Sustainable Agriculture</b>	<b>147</b>
6.1	Introduction . . . . .	147
6.2	Meaning of soil quality and soil health . . . . .	148
6.3	Challenges of soil quality . . . . .	149
6.4	Soil quality indicator . . . . .	149
6.5	Soil physical indicators . . . . .	150
6.5.1	Soil structure (aggregate stability, porosity) . . . . .	150
6.5.2	Water infiltration, soil available water and distribution . . . . .	151
6.5.3	Bulk density . . . . .	151
6.5.4	Rooting depth . . . . .	151
6.5.5	Soil surface cover . . . . .	152
6.6	Soil chemical indicators . . . . .	152
6.6.1	Soil pH . . . . .	152
6.6.2	Electrical conductivity . . . . .	152
6.6.3	Sorption capacity and cation exchange capacity . . . . .	153
6.6.4	Plant available nutrients . . . . .	153
6.7	Biological indicators . . . . .	153
6.7.1	Soil organic matter . . . . .	153
6.7.2	Soil carbon . . . . .	154
6.7.3	Potentially mineralizable C and N . . . . .	154
6.7.4	Soil microbial biomass . . . . .	155
6.7.5	Soil respiration . . . . .	155
6.7.6	Soil enzyme activity . . . . .	155
6.7.7	Microbial biodiversity and resilience . . . . .	156
6.7.8	Molecular techniques to measure genetic and functional biodiversity of microorganisms . . . . .	156
6.8	Minimum data set: Choosing a set of indicators . . . . .	157
6.9	Soil quality indices . . . . .	158

6.9.1	Storie Index Rating (SIR) . . . . .	160
6.9.2	Productivity index (PI) . . . . .	161
6.9.3	Soil Quality Index (SQI) . . . . .	161
6.9.4	Soil quality (Q) . . . . .	162
6.9.5	Soil quality index (QI) . . . . .	163
6.9.6	General Indicator of Soil Quality (GISQ) . . . . .	163
6.10	Conclusion and future perspective . . . . .	164
6.11	References . . . . .	164
<b>7</b>	<b>Integrated Farming Systems for Sustainable Agriculture</b>	<b>173</b>
7.1	Introduction . . . . .	173
7.2	Integrated farming systems for rainfed areas . . . . .	174
7.2.1	Watershed based farming systems . . . . .	175
7.2.2	Farmer/family centric farming systems . . . . .	176
7.3	Integrated farming systems for irrigated areas . . . . .	181
7.3.1	Multi-enterprise farming systems . . . . .	181
7.3.2	Integrated farming systems for hill ecosystem . . . . .	183
7.3.3	Integrated farming systems for coastal areas in Eastern India . . . . .	184
7.3.4	Integrated farming systems for coastal areas in Western India . . . . .	186
7.3.5	Conclusion . . . . .	188
7.3.6	References . . . . .	188
<b>8</b>	<b>Photosynthesis and Crop Production</b>	<b>193</b>
8.1	Introduction: Photosynthesis <i>versus</i> Photorespiration . . . . .	193
8.1.1	Energetic problem . . . . .	193
8.1.2	Trapping problem . . . . .	193
8.2	C <sub>3</sub> , C <sub>4</sub> , CAM plants photosynthesis . . . . .	194
8.2.1	C <sub>3</sub> plants . . . . .	195
8.2.2	C <sub>4</sub> plants . . . . .	195
8.2.3	CAM plants . . . . .	196
8.3	Measure of O <sub>2</sub> and CO <sub>2</sub> exchanges by <sup>18</sup> O <sub>2</sub> labelling . . . . .	197
8.4	Photosynthesis and photorespiration in C <sub>3</sub> plants . . . . .	198
8.4.1	CO <sub>2</sub> effect . . . . .	198
8.4.2	Photorespiration effect on photosynthetic yield . . . . .	199
8.4.3	Mirror effect . . . . .	199
8.4.4	Simulation of water stress . . . . .	200
8.4.5	Experimental data . . . . .	200
8.4.6	High light regulation . . . . .	201
8.5	Photosynthesis and photorespiration in C <sub>4</sub> plants . . . . .	202
8.5.1	CO <sub>2</sub> effect . . . . .	202
8.5.2	Light response of C <sub>4</sub> photosynthesis . . . . .	203
8.6	Photosynthesis and photorespiration in CAM plants . . . . .	204
8.6.1	Effect of CO <sub>2</sub> availability in CAM plants . . . . .	204
8.6.2	Short-term regulation . . . . .	204
8.6.3	Light regulation . . . . .	204
8.6.4	Water limitations – example of survival . . . . .	205
8.7	Photosynthesis and crop yield of CAM . . . . .	205

8.7.1	Photosynthesis efficiency . . . . .	205
8.7.2	Water use efficiency . . . . .	206
8.7.3	Crop yield . . . . .	206
8.8	Comparison of C <sub>3</sub> and C <sub>4</sub> characteristics . . . . .	206
8.8.1	Quantum yield for CO <sub>2</sub> uptake . . . . .	206
8.8.2	Temperature effect . . . . .	207
8.8.3	Crop yield . . . . .	207
8.8.4	Response of photosynthesis to high irradiances . . . . .	208
8.8.5	Water use efficiency (WUE) - nitrogen use efficiency . . . . .	209
8.8.6	Salinity tolerance . . . . .	209
8.9	Competition C <sub>3</sub> -C <sub>4</sub> . . . . .	209
8.10	C <sub>4</sub> paradox - C <sub>4</sub> <i>versus</i> C <sub>3</sub> in arid environments . . . . .	210
8.10.1	Field observations . . . . .	210
8.10.2	Laboratory analysis . . . . .	210
8.11	O <sub>2</sub> exchanges and stress resistance . . . . .	211
8.11.1	Physiological roles . . . . .	211
8.11.2	Safety and regulation roles of photorespiration . . . . .	211
8.11.3	Rubisco evolution . . . . .	212
8.11.4	Historical role in terrestrial atmosphere . . . . .	213
8.12	Crop growth and photosynthesis modelling . . . . .	213
8.12.1	Usefulness of models . . . . .	213
8.12.2	Biochemical models of photosynthesis . . . . .	213
8.12.3	FARQUHAR et al. model . . . . .	214
8.13	The two main keys of the photosynthetic yield . . . . .	214
8.13.1	Specificity of Rubisco . . . . .	214
8.13.2	Plant specificity factor for CO <sub>2</sub> . . . . .	214
8.13.3	Problem of limitations in modelling . . . . .	215
8.13.4	Relationship between Rubisco and plant specificities . . . . .	215
8.13.5	Effect of <i>S<sub>p</sub></i> on the photosynthesis yield . . . . .	217
8.13.6	Examples of difference between C <sub>3</sub> and C <sub>4</sub> plants . . . . .	218
8.13.7	Practical use of the simple model . . . . .	218
8.14	Genetic engineering . . . . .	219
8.14.1	Modification of <i>S<sub>r</sub></i> . . . . .	219
8.14.2	Introduction of C <sub>4</sub> like pre-carboxylation . . . . .	220
8.14.3	Short cut of the photorespiration pathway . . . . .	220
8.15	Conclusion . . . . .	220
8.16	References . . . . .	221
<b>9</b>	<b>Genotypic Variability in Rooting Pattern of Few Field Crops and its Adaptation to Salinity and Drought Stress</b> . . . . .	<b>231</b>
9.1	Introduction . . . . .	231
9.2	Materials and methods . . . . .	233
9.2.1	Plant material and experimental conditions . . . . .	233
9.2.2	Statistical analyses . . . . .	233
9.3	Results and discussion . . . . .	234
9.3.1	Cotton . . . . .	234
9.3.2	Maize . . . . .	236

9.3.3	Pearl millet . . . . .	238
9.3.4	Rice . . . . .	238
9.3.5	Sorghum . . . . .	240
9.3.6	Sunflower . . . . .	241
9.3.7	Wheat . . . . .	242
9.4	Conclusions . . . . .	242
9.4.1	Current status of breeding for roots . . . . .	243
9.4.2	Future research . . . . .	244
9.5	References . . . . .	244
<b>10</b>	<b>Salinity Tolerance in some Field Crops and its Management Strategies</b>	<b>253</b>
10.1	Introduction . . . . .	253
10.2	Management strategies . . . . .	254
10.3	Research progress in salinity tolerance of some crops . . . . .	255
10.3.1	Cotton ( <i>Gossypium hirsutum</i> L.) . . . . .	255
10.3.2	Maize ( <i>Zea mays</i> L.) . . . . .	257
10.3.3	Pearl millet ( <i>Pennisetum glaucum</i> (L.) R. Br.) . . . . .	262
10.3.4	Rice ( <i>Oryza sativa</i> L.) . . . . .	264
10.3.5	Sorghum ( <i>Sorghum bicolor</i> (L.) Moench.) . . . . .	265
10.3.6	Sunflower ( <i>Helianthus annuus</i> L.) . . . . .	266
10.3.7	Wheat ( <i>Triticum aestivum</i> L.) . . . . .	268
10.4	Discussion . . . . .	287
10.5	Conclusions . . . . .	291
10.6	References . . . . .	291
<b>11</b>	<b>Agroforestry: Concept, Benefits and Limitations</b>	<b>317</b>
11.1	Introduction . . . . .	317
11.2	Agroforestry . . . . .	318
11.2.1	Definition(s) . . . . .	318
11.3	Classification of agroforestry systems . . . . .	318
11.3.1	Structural classification of systems . . . . .	319
11.3.2	Classification based on function of systems . . . . .	320
11.3.3	Ecological classification . . . . .	321
11.4	Agroforestry systems and practices . . . . .	321
11.4.1	Major types of agroforestry systems in tropics . . . . .	321
11.5	Other agroforestry systems . . . . .	332
11.5.1	Intercropping under scattered or regularly planted trees . . . . .	332
11.5.2	Agroforestry for reclamation of problem soils . . . . .	334
11.5.3	Underexploited trees in indigenous agroforestry systems . . . . .	335
11.5.4	Buffer zone agroforestry . . . . .	335
11.6	Suitability of trees and different agroforestry systems . . . . .	336
11.7	Effects of agroforestry . . . . .	346
11.7.1	Beneficial effects . . . . .	346
11.7.2	Limitations of Agroforestry . . . . .	348
11.7.3	Impact on soil health . . . . .	349
11.8	Conclusion . . . . .	351
11.9	References . . . . .	351

<b>12 Transfer of Technology trough Farmers' Training Tools</b>	<b>357</b>
12.1 Introduction . . . . .	357
12.2 Items of transfer of technology . . . . .	358
12.3 Training . . . . .	358
12.4 Farmers' training tools . . . . .	359
12.4.1 According to their use . . . . .	359
12.4.2 According to their form . . . . .	360
12.4.3 Detailed description of the most important educational or training tools . . . . .	361
12.5 Conclusion . . . . .	373
12.6 Future strategies . . . . .	373
12.7 References . . . . .	374
<b>13 Browse Nutrition in Semi-Arid Lands of Mexico</b>	<b>377</b>
13.1 Introduction . . . . .	377
13.2 Browse utilization by ruminant animals . . . . .	378
13.3 Browse in animal production . . . . .	378
13.4 Chemical composition . . . . .	379
13.5 Implications . . . . .	384
13.6 References . . . . .	385
<b>14 Feed Additives, Growth Promoters and Probiotics in Animal Production</b>	<b>389</b>
14.1 Introduction . . . . .	389
14.2 Analizing additives . . . . .	389
14.3 Buffers . . . . .	390
14.4 Ionophores . . . . .	390
14.5 Exogenous enzymes . . . . .	391
14.6 $\beta$ -adrenergic agonists ( $\beta$ -AA) . . . . .	392
14.7 Probiotics . . . . .	394
14.8 Conclusion . . . . .	395
14.9 References . . . . .	396
