

# Contents

<b>1. Tomato</b>	<b>1-10</b>
1.1 Introduction	1
1.2 Economic importance	1
1.3 Origin	2
1.4 Taxonomy	2
1.5 Morphology	2
1.6 Anatomy	3
1.6.1 Root	3
1.6.2 Stem	3
1.6.3 Petiole	4
1.6.4 Leaf	5
1.6.5 Seed anatomy	6
1.7 Key points for identification	6
1.8 Germination	6
1.9 Growth and development	7
1.9.1 Leaf growth	7
1.9.2 Leaf elongation	7
1.9.3 Leaf expansion	7
1.9.4 Leaf senescence and abscission	8
1.9.5 Leaf biomass	8
1.10 Phenology	8
1.11 Pollination	8
1.12 Ideotype concept	9
1.13 Salt stress	9
1.14 Water stress	10
<b>2. Chilli</b>	<b>11-24</b>
2.1 Introduction	11
2.2 Economic importance	11
2.3 Prehistory and origin	12
2.4 Phylogeny	12
2.5 Genetic resource	13
2.6 Genetic diversity	13
2.7 Taxonomy	13
2.8 Morphology	14
2.9 Anatomy	14
2.9.1 Root	14
2.9.2 Stem	15
2.9.3 Petiole	16
2.9.4 Leaf	16
2.9.5 Seed anatomy	17
2.10 Key points for identification	17
2.11 Seed germination and seedling establishment	17
2.12 Factors effecting seed germination	18
2.13 Phenology	18

2.14	Pollinators and pollination	19
2.15	Fruit development and fruit ripening	20
2.16	Seed development and fruit set	21
2.17	Ideotype concept	21
2.18	Drought	22
2.19	Salinity	24
<b>3.</b>	<b>Egg plant / Brinjal</b>	<b>25-36</b>
3.1	Introduction	25
3.2	Nutritional value	25
3.3	Medicinal uses	25
3.4	Origin	26
3.5	Varieties	26
3.6	Genetic diversity	26
3.7	Taxonomy	27
3.8	Morphology	27
3.9	Anatomy	27
3.9.1	Root	27
3.9.2	Stem	29
3.9.3	Petiole	30
3.9.4	Leaf	31
3.9.5	Seed coat anatomy	32
3.10	Key points for identification	32
3.11	Seed germination	32
3.12	Seed dormancy	33
3.13	Seed vigour and seedling emergence	33
3.14	Seed priming: germination	33
3.15	Leaf growth	33
3.16	Phenology	34
3.17	Pollination	34
3.18	Pollen germination	35
3.19	Fertilization and fruit development	35
3.20	Yield components	35
3.21	Response to abiotic stress (salt stress and drought)	35
<b>4.</b>	<b>Okra / Bhendi</b>	<b>37-46</b>
4.1	Introduction	37
4.2	Economic importance	37
4.3	Medicinal uses	37
4.4	Origin and distribution	38
4.5	Taxonomy	38
4.6	Morphology	38
4.7	Anatomy	39
4.7.1	Root	39
4.7.2	Stem	39
4.7.3	Petiole	40
4.7.4	Leaf	41
4.7.5	Seed coat anatomy	42

4.8	Key points for identification	42
4.9	Seed characteristics	42
4.10	Germination and seed establishment	42
4.11	Flower bud differentiation	43
4.12	Photoperiod effect on flower initiation	43
4.13	Physiological basis of growth, development and productivity	43
4.14	Factors affecting photosynthesis	44
4.15	Fruit quality	44
4.16	Food quality	44
4.17	Food storage	44
4.18	Fruit dehydration	45
4.19	Okra gum	45
4.20	Mucilage	45
4.21	Osmotic stress	46
4.22	Salinity tolerance	46
<b>5.</b>	<b>Water melon</b>	<b>47-56</b>
5.1	Introduction	47
5.2	Economic importance	47
5.3	Food value	47
5.4	Origin	48
5.5	Genetic diversity	48
5.6	Genetic resources	49
5.7	Taxonomy	49
5.8	Morphology	50
5.9	Anatomy	51
5.9.1	Root	51
5.9.2	Stem	51
5.9.3	Petiole	52
5.9.4	Leaf	53
5.9.5	Seed coat anatomy	53
5.10	Key points for identification	54
5.11	Seed germination and seedling development	54
5.12	Pollination and pollenizers	54
5.13	Tetraploid water melon	54
5.14	Role of hormones on seed and fruit development	55
5.15	Development of seed attributes	55
5.16	Water melon and allelopathic chemical interactions	55
5.17	Physiology of drought tolerance in wild water melon	55
<b>6.</b>	<b>Bottle gourd</b>	<b>57-61</b>
6.1.	Introduction	57
6.2	Uses	57
6.3	Taxonomy	57
6.4	Morphology	58
6.5	Anatomy	58
6.5.1	Root	58
6.5.2	Stem	59

6.5.3	Petiole	60
6.5.4	Leaf	60
6.5.5	Seed coat anatomy	61
6.6	Key points for identification	61
6.7	Response to abiotic stress	61
<b>7.</b>	<b>Bitter gourd</b>	<b>62-68</b>
7.1	Introduction	62
7.2	Economic importance	62
7.3	Origin	62
7.4	Distribution and domestication	63
7.5	Genetic resource	63
7.6	Taxonomy	63
7.7	Morphology	64
7.8	Anatomy	64
7.8.1	Root	64
7.8.2	Stem	65
7.8.3	Petiole	65
7.8.4	Leaf	66
7.8.5	Seed coat anatomy	67
7.9	Key points for identification	67
7.10	Morphology, growth and development	67
7.11	Seed germination	68
7.12	Phenology	68
7.13	Response to abiotic stress	68
<b>8.</b>	<b>Cucumber</b>	<b>69-79</b>
8.1	Introduction	69
8.2	Economic importance	69
8.3	Origin	69
8.4	Genetic resource	69
8.5	Genetic diversity	70
8.6	Taxonomy	70
8.7	Morphology	71
8.8	Anatomy	71
8.8.1	Root	71
8.8.2	Stem	72
8.8.3	Petiole	73
8.8.4	Leaf	73
8.8.5	Seed coat anatomy	74
8.9	Key points for identification	75
8.10	Seed germination	75
8.11	Factors affecting germination and seedling growth	75
8.11.1	Growth promotor	75
8.11.2	Ethylene	76
8.12	Root growth	76
8.13	Adventitious root formation	76
8.14	Physiology of root development	76

8.15	Reproductive phase	77
8.16	Phenology	77
8.17	Pollen germination	78
8.18	Reproductive organs-ABA	78
8.19	Fruit development	78
8.20	Fruit Ripening	79
8.21	Yield Components	79
8.22	Response to abiotic stress	79
<b>9.</b>	<b>Ridge gourd</b>	<b>80-84</b>
9.1	Introduction	80
9.2	Economic importance	80
9.3	Taxonomy	80
9.4	Morphology	80
9.5	Anatomy	81
9.5.1	Root	81
9.5.2	Stem	81
9.5.3	Petiole	82
9.5.4	Leaf	83
9.5.5	Seed coat anatomy	84
9.6	Key points for identification	84
9.7	Response to abiotic stress	84
<b>10.</b>	<b>Sponge gourd</b>	<b>85-88</b>
10.1	Introduction	85
10.2	Taxonomy	85
10.3	Morphology	85
10.4	Anatomy	85
10.4.1	Root	86
10.4.2	Stem	86
10.4.3	Petiole	87
10.4.4	Leaf	87
10.4.5	Seed coat anatomy	88
10.5	Key points for identification	88
10.6	Response to abiotic stress	88
<b>11.</b>	<b>Cabbage</b>	<b>89-93</b>
11.1	Introduction	89
11.2	Economic importance	89
11.3	History and origin	89
11.4	Genetic diversity	90
11.5	Taxonomy	90
11.6	Morphology	90
11.7	Anatomy	91
11.7.1	Root	91
11.7.2	Stem	91

11.7.3	Leaf	92
11.8	Key points for identification	93
11.9	Response to abiotic stress	93
<b>12.</b>	<b>Coriander</b>	<b>94-98</b>
12.1	Introduction	94
12.2	Economic importance	94
12.3	Taxonomy	94
12.4	Morphology	95
12.5	Anatomy	95
12.5.1	Root	95
12.5.2	Stem	96
12.5.3	Petiole	97
12.5.4	Leaf	97
12.5.5	Seed coat anatomy	98
12.6	Key points for identification	98
12.7	Response to abiotic stress	98
	Glossary	99-103
	Bibliography	104-106
